Airthings for Business empowers you with sensors and software to:

1 Improve workplace well-being and productivity

2 Optimize energy usage and building performance

3 Attain certifications and meet regulatory demands

Go beyond mere measurements

Wireless Devices

Easy-to-install devices are designed to suit various spaces and occupancy levels. The Space Hub enables its proprietary long-range ultra-low-power protocol, allowing for cable-free device placement, extended battery life and eliminating the requirement for WiFi.

Actionable Insights

Gain valuable insights for efficient facility management, workplace well-being, and compliance with certifications and regulations. From real-time air quality data to occupancy rates and energy insights, Airthings for Business provides a holistic view via the dashboard and mobile app.

Seamless Connectivity

Effortlessly access Airthings data by utilizing our RESTful API, and use Webhooks or MQTT as your event-driven interface to receive data immediately after it has been registered and integrate this data with your existing BMS or BAS.
