

# Think you can't save more? Think again.

ANZ Centre, a 100,000ft<sup>2</sup> 5-year-old office and retail building, was rated as energy-efficient prior to deploying BTune. We helped them **save more**.

Reduction In  
Cumulative Monthly  
HVAC Energy Use

Reduction In  
Whole Building  
Energy Use

...all with no upfront cost or capital required.

Using the existing BAS and plant equipment, BTune quickly compares HVAC operation against industry best practice standards and autonomously executes supervisory controls around your personalized operational preferences.

**The result:** reduced energy use, running costs, and carbon emissions.

That's not all. With BTune in place, our building partners also get:

- Improved occupant comfort, productivity, and tenant retention
- Reduced maintenance call-outs and costs
- Decreased plant wear and tear and delayed plant renewal
- Savings that support higher net operating income and asset value
- Improved building ratings and investment positioning
- Verified results toward ESG and Net Zero goals

Ready to see how much more you could save?
