

BUILDINGS IOT

Cultivating ideas for intelligent buildings
from the ground up.

The Buildings IOT group is made up of Controlco, Kodaro and OTI, covering all aspects of building controls and automation from parts to software to installation and management of OT, IT and IoT.

BUILDINGS IOT IS:

Controlco

An industry-leading distributor of brand name building controls and innovative new products from BAS newcomers with a focus on IT/OT convergence and total building solutions.

KODARO

Building automation software built to prioritize action, reduce false alarms and get various stakeholders the insights they need to operate their buildings better.

O|T|I

A master systems integrator and building controls contractor bringing building systems and networks together to protect data, improve comfort, inform decisions, increase net operating income and enhance user experience.

Our engineers, programmers and project teams are focused on the future of digital buildings.
