

YOUR ONE SOURCE FOR CUSTOM IN-BUILDING AND CAMPUS CONNECTIVITY SOLUTIONS

Your Network. Your Rules.

Experience You Can Trust

Communication Technology Services (CTS) is the industry leader in Distributed Antenna Systems (DAS), small cells, public safety, private cellular networks, and Wi-Fi, having successfully deployed over 16,000 in-building wireless networks nationwide. Leveraging its three decades of industry experience, CTS designs, deploys, manages, and supports networks of all types across all major industry verticals.

We provide custom, carrier grade solutions for enterprise and mobile network operators, solving and managing the most complex network challenges. Our core capabilities are:

Design:

The CTS Design Center offers fast, precise RF modeling with top industry talent, ensuring MNO compliant, multi-technology solutions.

Build:

CTS deploys wireless networks across premier venues, ensuring superior value through expert technicians, scalable systems, and customer commitment.

Run:

Our team will handle ongoing management and maintenance once the in-building network is deployed to ensure optimal performance, allowing you to focus on your core business.

Support:

CTS's NOC provides 24/7 monitoring, analysis and remote repair, backed by a nationwide service fleet and expert technicians.

Services

Cellular DAS and Small Cell networks that exceed carrier-grade standards

Forté Neutral Source for guaranteed AT&T, T-Mobile or Verizon signal source

Public Safety DAS that satisfy local regulatory requirements

Private Cellular Networks that deliver optimum performance for mission critical applications

Wireless LAN networks for cost effective data coverage

SD-LAN for converged, cost effective fiber infrastructure

Maintenance, Monitoring, Repair and Dispatch

as-a-Service business models for peace of mind at a predictable price
