

We deliver smart building solutions that keep people safe and connected, and boost building performance.

CRUX Solutions is a leading network infrastructure, audio visual and security technology design and consulting firm with offices in Texas and Oklahoma that serve projects nationwide. We work extensively in the healthcare, education, commercial and government markets, with a special focus on tribal projects.

We engage with project owners early in the design process to define their technology requirements. By maintaining close collaboration with stakeholders throughout the process, we ensure the creation of comprehensive design documents. Our commitment to good communication and attention to detail helps us proactively address challenges and meet the owner's expectations for the technology they are investing in.

DESIGN, PROJECT MANAGEMENT, + CONSULTING SERVICES //

From concept through implementation, we deliver building solutions that enhance occupant experience.

Network Infrastructure Design + Consulting

From traditional network cabling to modern Fiber to the Edge infrastructure, we design every aspect of network infrastructure and provide services that ensure networks operate reliably.

Radio Frequency Design + Consulting

Eliminate RF coverage or compliance gaps with comprehensive needs assessments, solutions recommendations, and support incorporating RF coverage into your network design.

Security Design + Consulting

We take a holistic approach to site security, that encompasses training, process improvement, and technology solutions tailored to clients' unique security needs.

Intelligent Lighting Design + Consulting

CRUX is a leader in the design and installation of intelligent PoE lighting systems that make buildings more energy-efficient, safer, and healthier.

Audio Visual Design + Consulting

We deliver flexible, easy-to-operate audio-visual systems that can elevate the experience of a single room or an entire performance venue.

Specialty Healthcare Systems Design + Consulting

Our consultants have deep experience with specialty systems such as infant protection, patient wandering, asset tracking, nurse call, telemetry, and DAS.

Why Clients Choose CRUX

- » **Consulting.** CRUX Solutions specializes in consulting with building owners, architects, engineers, and program managers to design smart, flexible, efficient, and future-ready buildings.
- » **Experience.** We hold extensive experience in partnering with clients on private, public, and tribal projects. We are adept in navigating the budgetary concerns, regulatory requirements, and expectations that define these varying project types.
- » **Research.** We actively research and evaluate the newest technologies so we can offer clients the very best options available. Being product agnostic, we have the flexibility to recommend the most appropriate solutions and equipment for each project.
- » **Design.** Full-service design, project management, and training services mean that we partner with clients to design the best possible solution, then ensure it is implemented correctly and operators understand how to utilize it to its maximum potential.
- » **Service.** We prioritize exceptional service, which has earned us some of the highest client service and satisfaction ratings in the industry.
