

BuildingOS saves commercial building operators millions by providing better visibility into their data.

**The fastest way to turn your buildings' information into insights and savings.**

Building owners, operators, managers and occupants are increasingly focused on how building performance drives business performance. Unfortunately, they're often mired in a sea of paper, spreadsheets, and siloed solutions. For over a decade, Lucid has been helping operators use data to improve building operations, making building management easy.

“Improving our building operations improves the value of McKesson's portfolio. BuildingOS is a great tool to help us achieve this.”

Mike Huaco,  
SVP, Global Real Estate, McKesson

**Gain visibility**

Capture data in a single unified, real-time platform.

**Discover improvements**

Analyze complex data to find cost savings, improve productivity, and prioritize projects.

**Drive action**

Engage stakeholders with award-winning collaboration tools and deliver key findings when and where people need them.

# Powerful, Cloud-Based Building Management

- Single unified view into building performance data
- Energy and resource management
- Occupant engagement
- Operations analytics [O&M Analytics]
- Prescriptive fault detection

Trusted by hundreds of organizations

## BuildingOS Platform Features

### Powerful data integration tools

- ✓ 180+ integrations for automating utility, smart meter, sub-meter, building system and IoT devices.
- ✓ Robust data capture and cleaning tools.
- ✓ Meets the highest security needs of Fortune 500 customers.

### Data engine designed specifically for buildings

- ✓ Flexible data model designed specifically to manage ever-changing data types within buildings.
- ✓ Ability to normalize and structure diverse data sources and types into a complete, unified data set.
- ✓ Advanced algorithms to drive complex functions such as rates and tariffs and weather normalization.

### Award winning, intuitive interface for all users

- ✓ Drag and drop customizations of dashboards and reports.
- ✓ Dedicated service and support to ensure ongoing success.
- ✓ Responsive design for mobile access.

### Flexible reporting engine

- ✓ Create simple, powerful charts, graphs, and dashboards.
- ✓ Custom adhoc analysis and dashboard creation with simple UI tools.
- ✓ Collaborate with shared dashboards, scheduled emails, and proactive alerts, all driven from a single, complete data set.
- ✓ Easy integration into other platforms.

Lucid is the industry's leading provider of cloud-based building management software. Lucid believes that by improving how buildings operate, building owners and managers can find new efficiencies, drive tenant satisfaction and improve business performance. Lucid software centralizes commercial building data and makes it easy to discover new insights about how buildings and portfolios are actually performing in real time. Our cloud-based platform serves over 500 organizations, 15,000 buildings, and 1.5 billion square feet. The platform empowers energy management professionals, sustainability and operations teams to focus on efficient, cost-effective, and profitable management of their buildings.
