

Connected Building Solutions

**Buildings speak,
we respond.**

At MacDonald-Miller we blend traditional HVAC Mechanical services with innovative technology to provide our customers with comprehensive building intelligence. Using smart tools, we connect you with your building's data in a simple, meaningful, and actionable way.

We start by assessing your building based on type, age, equipment, and then create a scalable solution designed specifically for your needs and budget. Connected building solutions offers lower service costs, maximized equipment performance, increased comfort, report accessibility, and 24/7 monitoring.

IMPROVE VISIBILITY

Regular building health reports will be provided containing insights on energy consumption and HVAC equipment across all assets and locations.

INCREASE COMFORT

Building controls will monitor your system's performance in real-time, to ensure a comfortable, stable, environment with no downtime and no surprises.

REDUCE REPAIR EXPENSES

Building analytics will identify and predict problems before they turn into expensive issues. Accessible insights will help reduce number of service calls and overall annual maintenance expenses.

BENEFITS

- ✦ 24/7 Monitoring
- ✦ Emergency Response
- ✦ Building Health Reports
- ✦ Remote Access & Control
- ✦ Energy Savings
- ✦ Increased Comfort
- ✦ Lower Maintenance Costs
- ✦ High Energy Star Rating
- ✦ Increased Asset Value
- ✦ Workforce Optimization
- ✦ Rebate Money
- ✦ Optimal Maintenance

We make buildings work better.
