

Connect Your People, Places, and Spaces

Say goodbye to separate systems and manage every aspect of your workplace from one centralized solution.

Connected Workplace

With Nuvolo, you can seamlessly connect all your workplace and asset data to understand how your buildings are being used, create dynamic workspaces, streamline processes, ensure compliance, make informed decisions, and more.

The Only Truly Integrated Workplace Management System

Real Estate: Centralize all your owned and leased property details to plan, manage, and optimize your portfolio.

Capital Planning: Identify, assess, and prioritize your capital needs based on the most up-to-date data.

Capital Projects: Easily convert an approved capital plan into a project and manage it every step of the way.

Space: Make the most of your current spaces, plan for future space needs, and promote a positive employee experience.

Facilities Maintenance: Optimize maintenance operations and manage your assets lifecycle by centralizing all asset information.

Sustainability: Monitor your carbon footprint and track energy and waste to better plan for sustainability projects.

OT Security: Ensure the safety, accessibility, and availability of your operational technology.

Nuvolo is the only comprehensive IWMS built on the NOW platform; this makes it ideal for ServiceNow clients looking to leverage IWMS tools, as Nuvolo can seamlessly integrate into existing ServiceNow solutions.

2022 Verdantix Report

Because all of our products were built on one platform, data can easily be shared across teams to:

- Optimize Operations
- Break Down Silos
- Improve Cross-Team Communications
- Increase Visibility
- Make Strategic Decisions
