We deliver software and services to the Real Estate industry

Open Box Software has been helping the global Real Estate industry navigate the changing landscape of PropTech since 2001. Our industry experience, end-to-end service, and driving belief that “There’s Always a Better Way” makes us the perfect choice for practical, smart and cost-effective technology solutions for Real Estate. No matter the size or scope of the project, we deliver a remarkable experience, every time.

Application Support & Helpdesk

Open Box takes great pride in the creation and nurturing of mutually beneficial relationships with each and every client. We are constantly striving to operate as a true partner, not just a vendor. To ensure our clients have the very best in support long after the warranty period is over, we offer a wide range of technical and application support services, at flexible rates.

Business Intelligence & Analytics

Data is naturally produced by every organization, but the value is only realized when it is transformed into information that delivers insight and inspires action. The barrier to entry for business intelligence and analytics has historically been high, but at Open Box we have proven that with the new generation of fast, flexible BI tools nothing is stopping you from unlocking the value of your data and empowering your decision-makers today.

Custom Applications & Integrations

Whether you’re looking for a fully bespoke solution, a simple low code app, or a website that stands out from the crowd, Open Box has the skills and experience to deliver. Combined with our expertise in integrating against popular off-the-shelf PropTech solutions and ERPs, we can help you to develop the systems and solutions that bring your vision to life.

MRI Support & Services

With more than 10 years’ experience supporting and customizing MRI, our deep knowledge of the system and its toolkit means we are able to support you through implementation, customization or upgrade, every step of the way. From best practices to custom features and reports, we have the tools and expertise to ensure you get the most out of your investment in MRI.

Robotic Process Automation

RPA has been proven to work and is here to stay. Real Estate companies have welcomed the transformative potential of this new technology. Here at Open Box, we combine our wealth of experience in Real Estate business processes with our expertise in software and service delivery to help you get the most out of your automation journey.

Technology Consulting

All great ideas start with a question. Our clients rely on us to help answer those questions: whether it’s choosing the right tool for their business, finding the most cost-effective solution for their needs, or cutting through the hype to uncover the real value of new technologies.

There’s always a better way
