# PingCx

Autonomous commissioning for buildings

The only platform that will automate the startup, point-to-point checkout, and commissioning of building automation systems.

Save up to 25% of total project labor costs.

Product highlights

- Manage both the Automated Testing of sequences and the workflow for point-to-point testing, system startup, and commissioning.
- Easily upload BACnet BMS points database from supported BMS platforms regardless of naming conventions.
- Provides needed detailed audit and history of commissioning and testing process.
- Script-based, highly reusable, and repeatable testing.
- Create tests from a sample library, use the built-in wizard, or a simple text editor.

Features

- Supports a fully cloud-based and on-prem solution
- Highly secure and scalable architecture
- Hierarchical portal structure for the management of the Commissioning process with several user types
- Flexible test scheduling and execution
- Customizable reporting to fit Commissioning Provider and Owner requirements

Universally compatible

Honeywell   DISTECH CONTROLS   Automated Logic

TRIDIUM   Johnson Controls   SIEMENS

Schneider Electric   Delta CONTROLS   ABB
