Big Data. Better Places.

Steelcase® Workplace Advisor empowers organizations to measure the effectiveness of the workplace and improve it based on easy-to-understand, actionable data accessible through an online dashboard. It collects and analyzes precise data from the workplace—whether in one or several meeting rooms, in open plan spaces or across multiple campuses—to illuminate real-time and historical utilization trends.

How it Works

SENSORS
are added to the
workplace

WIRELESS GATEWAYS
send secure data
to the cloud

CLOUD PLATFORM
is powered by Microsoft
Azure and stores
information

DASHBOARD
applies intelligence
to create meaning
from data

FEATURES AND BENEFITS

Precision Data
Delivers accurate data through a
combination of spatial expertise
and proprietary algorithms

Security Via Microsoft Azure
Offers leading-edge stability
and protection of customer
data on the cloud platform

Real Time
Provides persistent, real-time
information visibility—current
data and historical trend
patterns over time

Scalability
Serves as a campus-wide
solution by detecting occupancy
in spaces ranging from meeting
rooms to open plan settings

**Remote Management
of Hardware**
Monitors (via Device Manager) and
maintains devices from anywhere

Searchable Data
Intuitive dashboard allows users
to search by time frame, location,
room amenities and attributes

Ease of Installation
Sensors and gateways are
preassigned to a specific space
and include all materials needed
for installation

Actionable Data
Enables companies to gain
insights and make informed
decisions on how to optimize
the workplace
