

PowerWise®

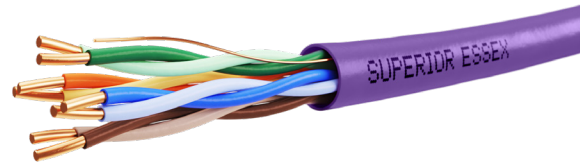

FOR EXTENDED DISTANCE

ENABLING YOUR SUSTAINABLE INTELLIGENT BUILDING

Reliable connection and durable power for your remote applications.

- Power-over-Ethernet technology delivers data and electrical power through one network cable.
- Connect all your smart-building applications to one central network for greater control.
- Used in hotels, office buildings, residential complexes, and many others to enable a sustainable, connected built environment.
- Contributes to green building certifications and your sustainability strategies.

The best cable for your sustainable building project!
