

# Next-Gen Network Infrastructure for Building Automation Systems

Secure your network while providing state-of-the-art, real-time services. Tosibox OT networks connect all your building systems with one platform. Streamline operations to focus on developing and managing your daily service operations cost-effectively.

## Digitize and Automate

Our patented technology is inspired by traditional IT but designed for the scope and scale building automation system integrator needs. Tosibox is the world's first automated and secure BAS networking platform.

- Invisible from the internet • Eliminate network attacks • Secure remote access
- Reliable data connections • Accelerate digitization strategy
