

# Natural light is better. That's our view.™

No blinds. No heat. No glare.

## **Abundant views. All day comfort.**

View Dynamic Glass tints intelligently in response to outdoor conditions reducing heat and glare while keeping you connected to the outside world.

Even at the darkest tint state, dynamic glass remains transparent and won't compromise your view.

## **Glass with an IQ. A look into the future.**

Using a cloud-based system, View Intelligence anticipates the sun's movement and continuously adjusts tint levels based on glare, heat, and daylight creating environments in which people thrive.

## **Energy savings. Greener planet.**

Reduce air conditioning and lighting costs by up to 20%.

Elevate your LEED certification and enhance your building's sustainability value while maximizing your views.
